Taking action on census results

Taking action on Census results

APS Employee Census results are a rich source of workplace information, and action planning is how these results and data are mobilised.

Consider using the guide on the next page to begin your approach to taking action on your Census results.

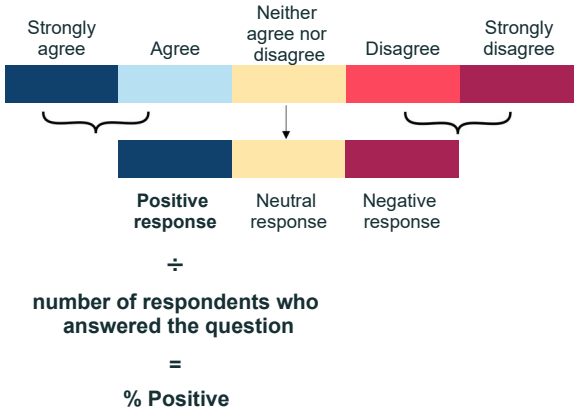
Guide to this report

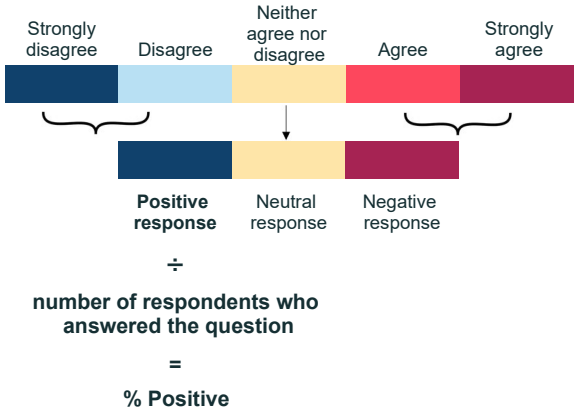
% Positive Score calculation

Where results are shown as positive percentages (% positive), these are calculated by adding together positive responses ("strongly agree" + "agree" or "always" + "often") and dividing by the number of respondents who answered the question.



Reverse Scored questions

For some questions, agreement with the question indicates an unfavourable outcome. For example, agreeing with the question "*I feel burned out by my work*".
In these instances, % Positive is calculated by adding together 'strongly disagree' + 'disagree' responses.



Calculation of index scores

The questions that comprise each index are asked on a five-point scale. To calculate a respondent's index score, their answers are recoded to fall on a scale between 0 and 100 (i.e. coded as 0, 25, 50, 75 or 100) and then averaged across all questions.

Index scores of individual respondents are combined and averaged to form a group score.

Rounding

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of calculation for maximum accuracy. Values from x.00% to x.49% are rounded down and values from x.50% to x.99% are rounded up. Therefore, in some instances, results may not total 100%.

Anonymity

It is best practice not to display the results of groups of respondents to the extent where the anonymity of individuals may be compromised.
Results will not be shown where there are less than 10 respondents in a group.

Comparisons to previous years

The method of analysing and reporting specific results may be periodically reviewed and revised. Such improvements are applied to current data and that of previous years. For this reason, the current report is always the most accurate data source for APS Employee Census results, including comparisons with time series data.
